UQSchoolsNet

INTERNET SERVICES

We assess the strategic ICT direction and goals of each school in order to offer an appropriate solution. All quotes and solutions are provided based on individual school requirements, keeping scalability, future planning, and redundancy in mind.

Products available to schools include:

- **P**oint-to-point connection services, with bandwidth options up to 10 Gbps.
- Optimal WAN connectivity—via dark fibre, Ethernet, IPs.
- Various carrier options between the school and UQ campus.
- Public address space provided.
- Secure private network, offered through Layer 2 and/or Layer 3 network services.
- DNS Services—we provide site-managed domain name servers.
- High speed Internet access.
- Internet backbone access through triple redundant high-speed, high-capacity fibre links.

If a product you require is not available, contact the business manager for assistance.
