

# Cloud Services

As a leading provider of premium network services and products specifically designed to meet the unique requirements of the education sector, we are pleased to announce our recent collaboration with a major supplier for The University of Queensland. This partnership enables us to offer secure private cloud services, utilising our private and dedicated links.

CompNow Cloud enables your organisation to have safe and secure backup or long-term retention storage solution.

## Microsoft 365 Backup

- Eliminates the risk of losing your Microsoft 365 data.
- Integrated with Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams.
- No data transfer charges.

## Archive Storage

- Archive your chosen files for long term storage.
- Replaces tape as a reliable long-term storage solution.
- Industry standard object-based storage.

## Virtual Machine Backup

- Increase your cyber resiliency through long term secure online storage.
- Instant access to your data.
- Adds secure expandable offsite backup for your virtual machines.

## CompNow Cloud Dashboard

- The CompNow Cloud dashboard is a powerful tool that provides a comprehensive overview of the backup infrastructure, streamlining the monitoring and management processes to ensure constant protection of company data.
- This advanced dashboard enables real-time monitoring of backup status, including crucial details such as the most recent backup time, backup size, and any encountered errors or warnings.
- The dashboard also displays the backup schedule, allowing visibility of the next scheduled backup and ensures backups are running on a regular basis.
- In addition, the dashboard provides detailed information about backup jobs, including backup source, destination, and type. This information enables the quick identification of any potential issues, enabling faster corrective actions to be taken.
